

<b>Criterion</b>	Excellent	Satisfactory	Needs improvement
<b>Completeness</b>	All parts of the assigned lab are complete.	All but the last section are complete, or all are complete with some minor holes throughout.	Significant portions of the assignment are incomplete.
<b>Correctness</b>	The submitted program correctly carries out the required behavior. The program never crashes, even when given invalid input.	The program largely carries out the required behavior, with some small exceptions. The program does not usually crash, but might in a few cases.	The program fails to implement the required behavior, or does so with some major problems; or the program is sometimes correct but often crashes.
<b>Documentation</b>	The program is well-documented, with comments explaining the behavior, parameters, and return value of each function, and comments explaining any interesting or nonobvious code. Functions are correctly annotated with their input and output types. If there is a README file, it thoroughly explains the program, its purpose and features, and how to use it.	The program is mostly well-documented, but there may be some missing comments, or some existing comments may be too terse, vague, or confusing. Some functions may be missing type annotations. A README file may be lacking some detail.	Many parts of the program are un-commented, or comments are unhelpful.
<b>Style</b>	The program uses good style throughout and is a pleasure to read: it uses consistent indentation and spacing, uses informative variable names, and avoids redundancy. Lines are not too long. Comments contain well-written, complete sentences.	The program mostly uses good style, with a few lapses or issues that need improvement that do not impair the overall readability.	Stylistic issues make the program difficult to read and understand.
<b>Reflection</b>	The submitted reflection document meets the stated requirements and contains a thoughtful discussion showing clear evidence of learning.	The reflection document mostly meets the stated requirements and shows evidence of learning.	The reflection document is missing, or contains a reflection that does not go beyond a superficial level.
